Instructions

You will need: one copy of the worksheet per pair

- Divide students into pairs, and give one copy of the worksheet to each pair. Students choose one of the products and write a script advertising the product, which they will read out to the class. Explain that the advert can be a TV or radio commercial.
- Explain that the keywords for each advert are just to give ideas, and students can use some or all (or none) of them. Encourage them to use as many of the adverbs in the box as possible.
- Monitor and help with vocabulary.
- When students are ready, put the pairs into groups of four (or six if you have a large class), and ask them to read out their adverts to each other. Students decide on the best advert in the group, which they then perform for the class.
- While students are performing their adverts, monitor carefully for correct use of adverbs (position and appropriacy), and make notes on any common errors for later class feedback.
